Scenario:

You are a hungry college student, as college students tend to be. Your schedule doesn't allow you to spend a lot of time at a campus dining hall during lunch time, so you decide to order food using the official, all-in-one, UOfSC app.

Task 1: Create your own order, using the Twisted Taco menu.

Task 2: I'm hungry and you have an extra meal swipe. Order me a cookie and venti hot chocolate from The Buzz.

Task 3: I've never been to the Horseshoe Deli before - tell me three sandwiches from their menu.

Bad Things
- Make it fast - speed is key
- Make a good color scheme
- Show meal swipe allowance from within the cart

Good Things
- Sold out listings
- Address for each location - good to find places
- Ingredients along with each item
